

# EMQnet

The foundational tool to manage your risk

Question	Yes / No	Best practice
Can your crisis/emergency management teams record and log key information during an incident?	<input type="checkbox"/>	Information should be recorded and logged to use as a reference during any response situation.
Is there a very clear procedure for activating crisis and emergency management teams?	<input type="checkbox"/>	A simple easily triggered messaging platform ensures the team can be notified immediately if a situation is emerging.
Do your teams have access to a 'common operating picture' containing up-to-date information about a crisis/emergency event, via desktop or mobile application, anywhere in the world?	<input type="checkbox"/>	Crisis and Emergency Management teams often do not have the luxury of being colocated during the response to an incident. Electronic crisis management platforms can provide this common operating picture for geographically dispersed teams, anywhere in the world.
Can your crisis/emergency management team members access key contact details and documents on a desktop or mobile application, from any device, anywhere in the world?	<input type="checkbox"/>	Storing this important information within an electronic platform allows teams members to access them anywhere, any time. Particularly as crisis events most often happen outside of regular work hours, when team members may not have access to contacts details and documentation.
Can your crisis/emergency management teams track tasks and stakeholder interactions remotely during a response?	<input type="checkbox"/>	Tracking tasks and stakeholder interactions during a response is essential to ensure actions are being taken to effectively respond to an event.
